COURSES AND EXPERIENCES				Discipline Specific Knowledge and Skills	Communication Skills	Critical Thinking Skills	COURSE ATTRIBUTES	
Prefix	Number	Title		Graduates will be able to properly utilize: commonly used economic terminology and indicators, microeconomic and macroeconomic theories (including special applications of those theories and the behavioral assumptions underlying those theories), and modeling techniques used for economic analyses. **Program- Level Learning Outcome 1** Students will be able to align common economic theories with their tenets and assumptions.	Graduates will be able to explain economic jargon and concepts to people who are not economists and properly employ economic terminology and theories to effectively communicate with other economists orally and in writing. **Program- Level Learning Outcome 2** Students will coherently argue, using proper economic terminology and supporting evidence, for or against a proposed solution to a policy problem.	Graduates will be able to evaluate potential benefits, risks, and trade-offs associated with various solutions to business or public policy problems. **Program- Level Learning Outcome 3** Students will use data analysis and economic reasoning to support the optimal solution to a business or public policy problem and explain why other potential solutions are sub-optimal based on the risks, trade-offs, and benefits of the solutions.	Expected Year of Course Completion for a Typical Full Time Student (e.g., Third Year of Study)	Is this course required for all students in the program? For only some students in the program? Is it a program elective? An elective offered by another department?)
