

University of South Florida

Morsani College of Medicine

Lehigh Valley Campus

ACTING INTERNSHIP

Emergency Medicine

MDI 8710

Syllabus

2023-2024

SELECT

Transmissible Disease Procedures

All students must be aware of and comply with university policies regarding Covid-19 and other transmissible diseases. They should also be aware of and comply with the policies at the clinical affiliates where their clinical training occurs. Failure to do so may result in disciplinary action.

Acting Internship Catalog Description

This acting internship integrates clinical skills and evidence-based medicine through didactic lectures, performance of clinical procedures, hands-on clinical experiences, observation and direct interaction with faculty, individual patients, and families. Students will manage the patient using the "team approach," which involves EMTs, nurses, physicians, and students. Students are expected to evaluate patients, address their presenting complaints, initiate workups, and provide definitive therapies.

Acting Internship Director's Welcome/ How To Be Successful

Welcome to your Emergency Medicine Acting Internship! The attending staff and residents of the Department of Emergency Medicine at Lehigh Valley Health Network recognize their responsibility to rotating students. We are committed to assisting each learner in attaining a relevant, useful and valuable clinical experience in emergency medicine. To this end, your rotation provides for direct supervision by our attending physician staff, physician assistants and emergency medicine residents. You will have exposure to a robust didactic schedule, which includes weekly grand rounds, a core lecture series using a case-based format from EM Foundations, CDEM Curriculum self-study modules, evidence-based medicine workshop, journal club, critical care and trauma simulation rounds, a variety of labs (suture, orthopedic, central line, lumbar puncture, airway, chest tube and cricothyrotomy), a toxicology and ultrasound experience, a series of procedure self-study modules and an optional autopsy, EMS and practical ultrasound experience. You will spend a shift with a nurse, complete a final exam and will be evaluated on your overall performance. Please review the Orientation Manual and the student website prior to the start of the rotation.

You will receive an email from Dawn Yenser, our clerkship coordinator and residency manager, prior to the start of your rotation. At that time, please respond with any scheduling requests. You will receive a welcome email a week prior to the start of your rotation, which will contain all of your necessary login information as well as your schedule. Please check it carefully for conflicts and let us know ASAP so we can correct them.

If you have any concerns prior to the start of your rotation, you may email Mrs. Yenser. She can answer most questions you have and assist you with scheduling issues if they arise. If you have any questions or concerns, please call me at the number below or email me. We look forward to meeting you, and we hope you enjoy your time at LVHN! Check out our website at <https://www.lvhn.org/education/residency-and-fellowship-opportunities/department-emergency-medicine-medical-student>. *Our goal is to provide the best clinical and didactic experience of your graduate training.*

Sincerely,
Deepak Jayant, DO
(w) 484-884-3013
(cell) 267-608-5504

Dr. Glenn Hamilton, Professor Emeritus from Wright State University, said it best,

“As you prepare for your acting internship, please recognize our chosen specialty has several gifts in store for you. First, its faculty and residents recognize the responsibility we have to train you to understand and operate in our realm. We understand the potential impact of early intervention as well as or better than any other practitioner. In education, a shared truth or corrected perception can last a lifetime, and this is what we plan to offer each of you who spend time with us.

In addition, we offer a unique contribution to your medical education. What we have to offer is a unique environment and an opportunity to practice fundamental skills to which you have had limited exposure thus far in medical school. The most important of these is acute care decision-making. That is a unique moment, usually unanticipated, when a patient forces you to make a series of decisions surrounded by uncertainty but of great importance nonetheless. Time is not your friend, and you quickly find there is nothing ‘cookbook’ about having a well-organized and thoughtful plan of approach in such a circumstance. You will not only exercise new regions of your brain, you will also get to use your hands when working with us. Technical skills and accompanying virtuosity are critical elements in the day-in, day-out practice of emergency medicine. Many of these skills—vascular access, airway management, lumbar puncture, and suturing—are all a part of a reasonable skill set for a senior medical student. Commitment to learning these skills can be highly variable in medical school, and opportunities to practice them may be limited. However, in the emergency department, you should have the opportunity to put them to use every day, just as we do.

Lastly, think of working in an environment where more than 145 million undifferentiated patients come to see you or your equivalent over the course of each year. Patients' illnesses and injuries are not always what they seem to be, and you will learn to respect that statement like never before. The approach to unraveling a voiced complaint on the part of a patient while thinking about all of the worst possibilities of potential origin is a very different way of thinking than most of your experiences to date. We believe that you will find this experience will serve you well, both with us and beyond.

Our specialty interacts with every other specialty, often at the raw interface of the unplanned admission on a 24-hour, 7-day clock. It is important to us that you are well treated, remember what goes on here, and leave with some degree of understanding and a modicum of respect and appreciation. Therefore, you should expect to be treated well but with discipline and high expectations."

Acting Internship Objectives – All Acting Internships

Course Objective	Program Objective	Specialty Track Phase Objectives
<p>Student will demonstrate the ability to gather a history from patients with a variety of clinical conditions within the course's specialty</p>	<p>1.2 Gather essential and accurate information about patients and their conditions through history-taking, physical examination, and the use of laboratory data, imaging, and other tests</p> <p>2.1 Demonstrate an investigatory and analytic approach to clinical situations</p> <p>4.1 Communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds</p> <p>4.7 Demonstrate insight and understanding about emotions and human responses to emotions that allow one to develop and manage interpersonal interactions</p>	<p>EPA 1: Gather a history and perform a physical examination</p>

	<p>5.1 Demonstrate compassion, integrity, and respect for others</p> <p>5.3 Demonstrate respect for patient privacy and autonomy</p> <p>5.5 Demonstrate sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual orientation</p> <p>8.1 Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in appropriate help-seeking behaviors</p> <p>8.5 Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in appropriate help-seeking behaviors</p>	
<p>Student will demonstrate the ability perform a physical exam with a variety of clinical conditions within the course's specialty</p>	<p>1.2 Gather essential and accurate information about patients and their conditions through history-taking, physical examination, and the use of laboratory data, imaging, and other tests</p> <p>2.1 Demonstrate an investigatory and analytic approach to clinical situations</p> <p>4.1 Communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds</p>	<p>EPA 1: Gather a history and perform a physical examination</p>

	<p>4.7 Demonstrate insight and understanding about emotions and human responses to emotions that allow one to develop and manage interpersonal interactions</p> <p>5.1 Demonstrate compassion, integrity, and respect for others</p> <p>5.3 Demonstrate respect for patient privacy and autonomy</p> <p>5.5 Demonstrate sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual orientation</p> <p>8.1 Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in appropriate help-seeking behaviors</p> <p>8.5 Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in appropriate help-seeking behaviors</p>	
<p>Student will demonstrate the ability prioritize a differential diagnosis and give rationale for prioritization</p>	<p>1.2 Gather essential and accurate information about patients and their conditions through history-taking, physical examination, and the use of laboratory data, imaging, and other tests</p> <p>1.4 Interpret laboratory data, imaging studies, and other</p>	<p>EPA 2: Prioritize a differential diagnosis following a clinical encounter</p>

	<p>tests required for the area of practice</p> <p>2.2 Apply established and emerging bio-physical scientific principles fundamental to health care for patients and populations</p> <p>2.3 Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision-making, clinical problem-solving, and other aspects of evidence-based health care</p> <p>2.4 Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision-making, clinical problem-solving, and other aspects of evidence-based health care</p> <p>3.1 Identify strengths, deficiencies, and limits in one's knowledge and expertise</p> <p>4.2 Communicate effectively with colleagues within one's profession or specialty, other health professionals, and health related agencies</p> <p>8.1 Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in appropriate help-seeking behaviors</p> <p>8.5 Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in</p>	
--	--	--

	<p>appropriate help-seeking behaviors</p> <p>8.8 Recognize that ambiguity is part of clinical health care and respond by utilizing appropriate resources in dealing with uncertainty</p>	
<p>Student will demonstrate the ability to recommend and interpret diagnostic tests for patients based upon their differential diagnosis</p>	<p>1.4 Interpret laboratory data, imaging studies, and other tests required for the area of practice</p> <p>1.5 Make informed decisions about diagnostic and therapeutic interventions based on patient information and preferences, up-to-date scientific evidence, and clinical judgment</p> <p>1.7 Counsel and educate patients and their families to empower them to participate in their care and enable shared decision making</p> <p>1.9 Counsel and educate patients and their families to empower them to participate in their care and enable shared decision making</p> <p>2.1 Demonstrate an investigatory and analytic approach to clinical situations</p> <p>2.4 Apply principles of epidemiological sciences to the identification of health problems, risk factors,</p>	<p>EPA 3: Recommend and interpret common diagnostic and screening tests</p>

	<p>treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations</p> <p>3.9 Obtain and utilize information about individual patients, populations of patients, or communities from which patients are drawn to improve care</p> <p>6.3 Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care</p> <p>8.1 Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care</p> <p>8.5 Demonstrate trustworthiness that makes colleagues feel secure when one is responsible for the care of patients</p>	
<p>Student will demonstrate the ability to create and implement a therapeutic plan based upon their differential diagnosis which includes entering orders and prescriptions.</p>	<p>1.2 Gather essential and accurate information about patients and their conditions through history-taking, physical examination, and the use of laboratory data, imaging, and other tests</p> <p>1.5 Make informed decisions about diagnostic and therapeutic interventions based on patient information and preferences, up-to-date scientific evidence, and clinical judgment</p>	<p>EPA 4: Enter and discuss orders and prescriptions</p>

	<p>1.6 Develop and carry out patient management plans</p> <p>3.1 Identify strengths, deficiencies, and limits in one's knowledge and expertise</p> <p>3.7 Use information technology to optimize learning</p> <p>4.1 Communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds</p> <p>6.3 Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care</p> <p>8.1 Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in appropriate help-seeking behaviors</p> <p>8.5 Demonstrate trustworthiness that makes colleagues feel secure when one is responsible for the care of patients</p>	
<p>Student will demonstrate the ability to document a clinical encounter in the patient record</p>	<p>1.4 Interpret laboratory data, imaging studies, and other tests required for the area of practice</p> <p>1.6</p>	<p>EPA 5: Document a clinical encounter in the patient record</p>

	<p>Develop and carry out patient management plans</p> <p>4.1 Communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds</p> <p>4.2 Communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds</p> <p>4.5 Maintain comprehensive, timely, and legible medical records</p> <p>5.4 Demonstrate accountability to patients, society, and the profession</p> <p>6.1 Work effectively in various health care delivery settings and systems relevant to one's clinical specialty</p> <p>8.1 Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in appropriate help-seeking behaviors</p> <p>8.5 Demonstrate trustworthiness that makes colleagues feel secure when one is responsible for the care of patients</p>	
--	--	--

<p>Student will demonstrate the ability to see multiple patients in a clinical session while maintaining accuracy and thoroughness of their history taking, physical exam skills, ability to create a differential diagnosis and implementation of the clinical plan.</p>	<p>1.2 Gather essential and accurate information about patients and their conditions through history-taking, physical examination, and the use of laboratory data, imaging, and other tests</p> <p>1.4 Interpret laboratory data, imaging studies, and other tests required for the area of practice</p> <p>1.6 Develop and carry out patient management plans</p> <p>2.1 Demonstrate an investigatory and analytic approach to clinical situations</p> <p>4.1 Communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds</p> <p>4.2 Communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds</p> <p>4.5 Maintain comprehensive, timely, and legible medical records</p> <p>4.7 Demonstrate insight and understanding about emotions and human responses to emotions that allow one to develop and manage interpersonal interactions</p>	<p>EPA 1-5</p>

--	---	--

Course Objectives:

This rotation will enrich students' knowledge, help them develop history-taking ability, physical skill assessment, diagnostic and management skills, as well as help them develop a caring, compassionate and empathetic attitude in dealing with patients and their families.

Rotation-Specific Entrustable Professional Activities (EPAs)

EPA 1. Demonstrate the ability to gather an accurate and appropriate history from patients with a variety of clinical conditions in the ED

EPA 2. Demonstrate the ability to perform a complete and focused physical exam with a variety of clinical conditions in the ED

EPA 3. Demonstrate the ability to prioritize a differential diagnosis and give rationale for prioritization

EPA 4. Demonstrate the ability to recommend and interpret diagnostic tests for patients based upon their differential diagnosis

EPA 5. Demonstrate the ability to create and implement a therapeutic plan based upon their differential diagnosis

EPA 6. Demonstrate the ability to document a clinical encounter in the patient record

EPA 7. Demonstrate the ability to provide a concise and organized, yet pertinent oral presentation of a clinical encounter

EPA 8. Demonstrate the ability to see a reasonable number of patients in a clinical session while maintaining accuracy and thoroughness of their history taking, physical exam skills, ability to create a differential diagnosis & implementation of the clinical plan

EPA 9. Demonstrate the ability to investigate clinical questions and apply evidence they obtained from the literature to patient care

EPA 10. Participate in the patient handover process to responsibly provide appropriate transition of care

EPA 11. Demonstrate the ability to collaborate as a member of an interprofessional team

EPA 12. Demonstrate the ability to recognize if a patient needs to be transitioned to an increased or decreased level of care

EPA 13. Participate in obtaining of consent for therapeutic care where only verbal consent is required

EPA 14. Demonstrate the ability to perform procedures appropriate for their track specialty

EPA 15. Practice the proper utilization of the clinical laboratory and the radiology department as they relate to emergency care using clinical decision rules and risk stratification

EPA 16. Review all ECG's of your patients and explain basic ECG interpretation

EPA 17. Explain the principles of pain management in pediatric and adult patients seen in the ED

EPA 18. Review the indications and practice of procedural sedation and analgesia (PSA) in pediatric and adult patients in the ED

EPA 19. Review the principles of difficult airway assessment along with basic and advanced airway management

EPA 20. Review the general principles, indications for and utilization of POCUS in the ED

ACTING INTERNSHIP SCHEDULE

1. Each student will be assigned 13 clinical shifts. You will rotate between our Cedar Crest and Muhlenberg Hospital sites and have an opportunity to work in our Children's ER (CHER) and the Critical Care Pod at Cedar Crest. You will have an opportunity to participate in all trauma alerts. In addition, you will be scheduled for a day with a nurse. Your schedule will be sent in advance.
2. Grand Rounds will occur every Wednesday from 9A – 2P either virtually or at our LVHN auditorium or Conference rooms. A nationally known guest speaker will usually present the first Wednesday of each month.
3. Suture/ortho lab will typically occur during the first Tuesday of each month at the Surgery Education Center from 9A – 12P.
4. Evidence-based medicine (EBM) workshop will typically occur the first Tuesday of each month from 1P – 3P either virtually or a location to be determined.
5. Trauma Simulation Rounds will occur the 3rd Tuesday of each month at the Center for Healthcare Education from 9A – 12P. Procedure labs include cricothyrotomy, IO and chest tube.
6. Critical Care Simulation Rounds will occur the 4th Tuesday of each month at the Center for Healthcare Education from 9A – 1P. Procedure labs include airway, lumbar puncture and central line.
7. Introduction to Point of Care Ultrasound (POCUS) will occur the 2nd Tuesday of every month from 1P – 3P in the Emergency Medicine Residency Suite at Muhlenberg Hospital.
8. Besides what is listed all other student didactics will occur on the other Tuesdays from 9A – 2P either virtually or in the Emergency Medicine Residency Suite. This will either be in lecture format or using a case-based format from EM Foundations.

Optional Activities

1. EMS ride-along
2. Autopsy experience
3. Practical US experience
4. Toxicology experience
5. Procedures Consult modules (37)

Logs Required

1. Patients seen over the month
1. Procedures observed, participated in or completed
2. Follow-ups (minimum of 2)

Acting Intern Locations (address, room#, clinic phone #)

1. Emergency Medicine Residency Suite
2545 Schoenersville Road
5th Floor – South Building
Bethlehem, PA 18017
(w) (484)-884-2489
2. Acute Care and Trauma Center (ACTC)
Lehigh Valley Hospital – Cedar Crest
1200 S. Cedar Crest Blvd.
Allentown, PA 18103

DIDACTIC READING ASSIGNMENTS

Review CDEM M4 Curriculum at www.cdemcurriculum.com (50 self-study modules)

Over the course of your M4 year we highly recommend the Bridge to EM Course which is an 8-week curriculum to transition from senior medical student to EM intern. You should complete this prior to starting your intern year. <https://www.aliem.com/bridge-to-em/>

Access to all textbooks, E materials and other resources are available under our Resources page on the student website.

FINAL GRADING RUBRIC (H, PC, P, F) Delete the instructions when entered

GRADING COMPONENTS

A student's grade is based on three components:

- a) Overall clinical performance and participation (80%)
- b) Assigned Case Presentation (10%)
- c) National EM M4 Final Exam (10%)

Your Evaluation-The Specifics

- a. **Clinical Evaluation** – We assess each student on their history and exam skills, case presentations, differential diagnosis, test utilization, re-evaluation of patients, medical knowledge, work ethic, teamwork and communication utilizing the SLOE format. You may present to PGY-3s, PGY-4s, PAs and attendings. We encourage you to solicit feedback from your supervising physician(s). You must send an evaluation link via New Innovations to ALL supervising physicians you presented to. Do this preferably before the end of your shift. You will receive mid-term feedback from one of our chief residents. At the mid-term feedback we will ask for any additional faculty / residents that you wish to receive an evaluation. You will have an evaluative simulation towards the end of your rotation which will count towards your clinical evaluation. Your clinical evaluation is 80% of your grade. At the end of the rotation, the AI director collects feedback from the resident team and creates a composite evaluation on E-value. Every student will receive a consensus-based Standard Letter of Evaluation (eSLOE) unless he/she specifies otherwise. Don't forget to submit your ACGME waiver for the SLOE. This waives your right to see the SLOE.
- b. **Oral Case Presentation** – You will present one 15-minute case-based topic in emergency medicine on a patient you had seen in our ED. It can be on any topic. Try to make it interactive and if appropriate use actual radiological images, ECG's, etc. from the case. Use as many references available to you. Typically this would be given during a mutually agreeable time and date. This is 10% of your grade.
- c. **Written Final Exam** – You will be given a 50-question written final exam at the end of your rotation at our Emergency Medicine Residency Suite. This will be proctored by our staff. You need to arrange a time with our staff ahead of time in order for them to administer the exam. The exam content will be based upon your clinical and didactic experiences during your rotation and the CDEM Curriculum self-study modules. This is 10% of your grade.
- d. **Written Notes** – You are required to complete at least one written H&P per shift. These paper "T-Charts" may be printed from the student website. Please include a written summary in the Course section of the chart as to why you arrived at a particular diagnosis and include a differential diagnosis.

Honors Eligibility

Students often ask about what preceptors look for in distinguishing the “average” from the “truly outstanding” or honors student. In order to be eligible for an Honors grade, a student must achieve ALL of the following:

1. Receive outstanding clinical evaluations from your supervising physicians. Need to be consistently evaluated as a fourth-year student or intern level.
2. Demonstrate professional behavior at all times.
3. Participate during scheduled activities except in case of an excused, documented absence.
4. Complete all AI requirements.
5. Adhere to the honor code.

Pass with Commendation Eligibility (HIGH PASS)

In order to be eligible for a pass with commendations grade, a student must achieve ALL of the following:

1. Receive above average clinical evaluations from the resident team and faculty. Need to be consistently evaluated as a beginning of fourth year, fourth year student, or intern level.
2. Demonstrate professional behavior at all times.
3. Participate during scheduled activities except in case of an excused, documented absence.
4. Complete all AI requirements.
5. Adhere to the honor code.

Pass Eligibility

In order to be eligible for a grade of Pass, a student must achieve ALL of the following:

1. Receive average evaluations (meet expectations) from clinical preceptors.
2. Complete all clerkship requirements.
3. Demonstrate professional behavior at all times.
4. Demonstrate adherence to the honor code.

Professionalism:

Any breach of the professionalism as described in the MCOM handbook including but not limited to the professionalism values section and the social media participation guidelines, may be grounds for remediation or failure of the course as determined by the course director in consultation with the Assistant Dean for the Clinical Curriculum.

GRADE APPEALS:

A student may appeal a course grade if the student has evidence that the grade was assigned in an erroneous manner. Within five (5) school days after the receipt of the grade, the student may appeal in writing to the responsible Course director any assigned grade that they dispute. See handbook for details of the process.

Students are expected to review and be familiar with the student handbook in general.

<https://health.usf.edu/medicine/mdprogram/student-affairs/handbook>

In particular for this course students are expected to review the following areas in the handbook for specific details:

MCOM Clinical Years Monitoring Student Time Guideline

COM students are held to the same work hour guidelines as are residents, per ACGME guidelines. Students are limited to a maximum of 80 duty hours per week including in-house call, *averaged* over four weeks. Students must be given one day out of seven free from all clinical and educational responsibilities, *averaged* over four weeks. Students cannot be scheduled for in-house call more than once every three nights, *averaged* over four weeks. Students may not work more than 28 consecutive hours. Students should be given at least ten hours for rest and personal activities between daily duty periods and after in-house call. Students, residents, and faculty are not permitted to allow/require deviation from the above rules.

MCOM Medical Student Clinical Supervision Guideline

Medical students may not provide care in an unsupervised fashion. Supervisors must either hold a faculty appointment or be supervised in their teaching and assessment role by an individual who has a faculty appointment. This may include residents, fellows, and other licensed health professional faculty supervising an activity within their scope of expertise or practice. Medical students may be supervised at one of two broad levels: 1) Direct observation or 2) Immediately available indirect supervision.

Attendance

During the clinical years the student's responsibilities lie within the individual course. Attendance within a given course is a demonstration of attitude and professional behavior. This behavior impacts all members of the healthcare team, including fellow students and patients. Any absence from the course may have a direct impact on student performance, the clinical experience, the evaluation of professionalism, the overall grade, and the successful completion of the clerkship. Students who miss scheduled hours are expected to acquire the same level of competency as other students in the clerkship. Lectures, reading assignments and clinical duties will not be re-created or offset to accommodate any absences. All absences are at the discretion of the course director. Students should follow the procedure guidelines for obtaining an excused absence outlined in the

handbook. The course director will use the guidelines outlined in the student handbook when determining if the absence is excused.

Residency Interviews

Students are expected to schedule residency interviews during months that they are not scheduled to have a clinical course. Student may miss up to 2 days for interviews, but those days must be made up.

Mistreatment guideline and procedure

USF Health's Morsani College of Medicine is committed to assuring a safe, encouraging, and supportive learning environment that reflects commitments to professionalism, respect, diversity, and virtues such as integrity, compassion, and kindness. All MCOM faculty and staff are expected to conduct themselves in a professional manner and contribute to creation of a culture that is supportive of learning. Mistreatment, bullying, discrimination, harassment, and sexual harassment are prohibited at MCOM. The student mistreatment policy, in accordance with LCME standard 3.6, ensures that concerns about the learning environment are promptly dealt with and resolutions reached in a fair and just manner. The College forbids any retaliatory action against students who present grievances in good faith.

The MCOM Student Mistreatment policy aims to safeguard medical students from mistreatment by any faculty member or staff associated with MCOM, including clerkship directors, attending physicians, residents, and other medical students by:

- educating members of MCOM about student mistreatment;
- prohibiting medical student mistreatment by anyone associated with MCOM;
- encouraging the early identification of medical student mistreatment as a preventative measure;
- identifying individuals to whom medical students can report mistreatment;
- requiring those who receive complaints regarding student mistreatment to report the complaint to the appropriate administrator;
- providing a confidential system for reporting mistreatment;
- assuring confidentiality to the fullest extent possible;
- assuring that all reports of mistreatment will be thoroughly and promptly addressed;
- providing an avenue for corrective action.

Reports of mistreatment will preferably be addressed within an informal framework when appropriate, but formal procedures are available for use when necessary.

MCOM is committed to preventing mistreatment of medical students through education of the MCOM community. The policy and related procedures will be disseminated among MCOM on an annual basis. Additionally, MCOM will periodically use varying methods (e.g., email, workshops, orientations) to inform medical students, faculty, and staff about medical student mistreatment and the MCOM policy on addressing mistreatment.

Professionalism guidelines and procedures

Professionalism is grounded in the fundamental values of honesty, integrity and fairness and is an essential part of the practice of medicine. Students are expected to display and will be examined by these exemplary behaviors. Students are expected to uphold their responsibility to their profession, and to appreciate that behaviors outside of the classroom and clinical learning environments can impact their progression through the program.

In addition to behavioral standards related to the medical profession, students are expected to uphold the principles of honor set forth by the University of South Florida in The Commitment to Honor code.

Attitudes or behaviors inconsistent with compassionate care; refusal by, or inability of, the student to participate constructively in learning or patient care; derogatory attitudes or inappropriate behaviors directed at patients, peers, faculty or staff; misuse of written or electronic patient records; or other unprofessional conduct can be grounds for dismissal and will be reviewed by the APRC.

Title IX Policy:

Title IX provides federal protections for discrimination based on sex, which includes discrimination based on pregnancy, sexual harassment, and interpersonal violence. In an effort to provide support and equal access, USF has designated all faculty (TA, Adjunct, etc.) as Responsible Employees, who are required to report any disclosures of sexual harassment, sexual violence, relationship violence or stalking. The Title IX Office makes every effort, when safe to do so, to reach out and provide resources and accommodations, and to discuss possible options for resolution. Anyone wishing to make a Title IX report or seeking accommodations may do so online, in person, via phone, or email to the Title IX Office. For information about Title IX or for a full list of resources please visit: <https://www.usf.edu/title-ix/gethelp/resources.aspx>. *If you are unsure what to do, please contact Victim Advocacy – a confidential resource that can review all your options – at 813-974-5756 or va@admin.usf.edu.*

Diversity, Equity, and Inclusion Statement:

The vision of the Morsani College of Medicine (MCOM) Student Diversity and Enrichment programs is to encourage and promote an environment that welcomes and embraces diversity

in the student body. We diligently ensure that all students feel supported and accepted in order to optimize their educational experience. USF MCOM defines diversity not solely limited to race and ethnicity, but also encompass talents, life skills and special attributes.

Should you need further assistance or more information about our many USF Health Morsani College of Medicine's diversity-driven events, outreach, and support programs, please contact the Office of Student Diversity and Enrichment at (813) 396-9944 or visit the OSDE contact page directly. More information about USF Health and its commitment to diversity [can be found here](#).

For any disputes in which a student has allegedly violated USF policies or rules, please contact [The Office of the Student Ombudsman](#), at (813) 974-0835 or [Student Conduct and Ethical Development](#), ALN 109, (813) 974-9443 for assistance.

Evaluation Compliance guideline

Student feedback is an essential component for continuous quality improvement of our teaching faculty and curriculum development. Morsani College of Medicine (MCOM) has implemented the following guidelines for all students currently enrolled:

1. Students will be required to complete a minimum of 80% of the evaluations assigned to them
2. All evaluations should be completed within 25 days upon receipt
3. Students may suspend evaluations only given the following circumstances:
 - a. The evaluation was assigned in error
 - b. The student did not spend enough time with an educator to properly evaluate them
4. At most students will be permitted to suspend up to 20% of their evaluations. Once a student exceeds a 20% suspension rate their evaluations will be reviewed on a case by case basis
5. Comments provided on evaluations should be constructive, respectful, and made in a professional manner

Please note that levels of anonymity are strictly enforced and fail safes are put into place to ensure a student cannot be identified from their evaluation.

Student evaluation completion compliance rates will be monitored on a quarterly basis and any student found to be out of compliance at the time will be required to attend a mandatory one hour session to complete any pending evaluations. Students will receive a notice via email that they are required to attend the mandatory session to complete their evaluations. Failure to

complete evaluations and/or attend the mandatory sessions may result in the following disciplinary actions:

1. A written notice from the Associate Dean of Undergraduate Medical Education
2. A mandatory meeting with the Associate Dean of Undergraduate Medical Education
3. Appearance before the Academic Performance Review Committee (APRC)

**Above is a summary of the USF Student Evaluation Procedure. Please review MCOM's Student Handbook for the full text of this policy.*

Sessions Recording Policy

In this class, software will be used to record live class lectures and discussions. As a student in this class, your participation in live class discussions will be recorded. These recordings will be made available only to students enrolled in the class, to assist those who cannot attend the live session or to serve as a resource for those who would like to review content that was presented. Recording may be used in subsequent semester for instructional purposes in necessary. Participation in the sessions is considered consent for recording. In courses in which video of students might be captured due to online software being used, students who prefer to participate via audio only will be allowed to disable their video camera so only audio will be captured. A student's use of video during the session is considered consent for the video to be recorded and used as previously described.

This option to disable video will not apply to video proctored exams. Please discuss recording options with your instructor. Students may use the recordings as a resource to review content. Copying or distributing the video recordings by students is prohibited and considered a professionalism violation.

Student Accessibility and Accommodation

University of South Florida Morsani College of Medicine (MCOM) is committed to providing equitable access to learning opportunities to students with documented disabilities (e.g., mental health, attentional, learning, chronic health, sensory, or physical).

To ensure access to this class, and program, please contact Student Accessibility Services to engage in a confidential conversation about the process for requesting reasonable accommodations in the classroom and clinical settings.

Accommodations are not provided retroactively. Students are encouraged to register with Student Accessibility Services as soon as they begin their program. The University of South Florida Morsani College of Medicine encourages students to access all resources available

through Student Accessibility Services for consistent support and access to their programs. More information can be found online at [Student Accessibility Services](#).

LINK TO UNIVERSITY REGULATIONS AND POLICIES

<http://regulationspolicies.usf.edu/policies-and-procedures/pdfs/policy-11-008.pdf>

MCOM Program Objectives

1. Patient Care

Provide patient-centered care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health

- 1.1 Perform all medical, diagnostic, and surgical procedures considered essential for the area of practice
- 1.2 Gather essential and accurate information about patients and their conditions through history-taking, physical examination, and the use of laboratory data, imaging, and other tests
- 1.3 Organize and prioritize responsibilities to provide care that is safe, effective, and efficient
- 1.4 Interpret laboratory data, imaging studies, and other tests required for the area of practice
- 1.5 Make informed decisions about diagnostic and therapeutic interventions based on patient information and preferences, up-to-date scientific evidence, and clinical judgment
- 1.6 Develop and carry out patient management plans
- 1.7 Counsel and educate patients and their families to empower them to participate in their care and enable shared decision-making
- 1.8 Provide appropriate referral of patients including ensuring continuity of care throughout transitions between providers or settings, and following up on patient progress and outcomes
- 1.9 Provide health care services to patients, families, and communities aimed at preventing health problems or maintaining health
- 1.10 Provide appropriate role modeling
- 1.11 Perform supervisory responsibilities commensurate with one's roles, abilities, and qualifications

SELECT 1.12 Perform values-based patient-centered comprehensive assessment, diagnosis and patient management, utilizing shared decision making in care of the patient.

2. Knowledge for Practice

Demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care

- 2.1 Demonstrate an investigatory and analytic approach to clinical situations
- 2.2 Apply established and emerging bio-physical scientific principles fundamental to health care for patients and populations
- 2.3 Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision-making, clinical problem-solving, and other aspects of evidence-based health care
- 2.4 Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations
- 2.5 Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial and cultural influences on health, disease, care seeking, care compliance, and barriers to and attitudes toward care
- 2.6 Contribute to the creation, dissemination, application, and translation of new health care knowledge and Practices

SELECT 2.7 Examine national and international health systems, policy and finance.

3. Practice-Based Learning and Improvement

Demonstrate the ability to investigate and evaluate one's care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and life-long learning

- 3.1 Identify strengths, deficiencies, and limits in one's knowledge and expertise
- 3.2 Set learning and improvement goals
- 3.3 Identify and perform learning activities that address one's gaps in knowledge, skills, and/or attitudes
- 3.4 Systematically analyze practice using quality improvement methods, and implement changes with the goal of practice improvement
- 3.5 Incorporate feedback into daily practice
- 3.6 Locate, appraise, and assimilate evidence from scientific studies related to patients' health problems
- 3.7 Use information technology to optimize learning
- 3.8 Participate in the education of patients, families, students, trainees, peers, and other health professionals
- 3.9 Obtain and utilize information about individual patients, populations of patients, or communities from which patients are drawn to improve care
- 3.10 Continually identify, analyze, and implement new knowledge, guidelines, standards, technologies, products, or services that have been demonstrated to improve outcomes

SELECT 3.11 Demonstrate advanced competency in self- assessing knowledge gaps and setting improvement goals, then perform activities to accomplish these.

SELECT 3.12 Analyze a health care environment or system and recommend changes to improve patient outcomes.

4. Interpersonal and Communication Skills

Demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals

- 4.1 Communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds
- 4.2 Communicate effectively with colleagues within one's profession or specialty, other health professionals, and health related agencies
- 4.3 Work effectively with others as a member or leader of a health care team or other professional group
- 4.4 Act in a consultative role to other health professionals
- 4.5 Maintain comprehensive, timely, and legible medical records
- 4.6 Demonstrate sensitivity, honesty, and compassion in difficult conversations, including those about death, end of life, adverse events, bad news, disclosure of errors, and other sensitive topics
- 4.7 Demonstrate insight and understanding about emotions and human responses to emotions that allow one to develop and manage interpersonal interactions

SELECT 4.8 Demonstrate advanced team leadership skills that enhance team functioning, the learning environment, and/or the health care system.

SELECT 4.9 Communicate effectively and sensitively with patients, adjusting language and style in order to incorporate their knowledge, values, and culture.

5. Professionalism

Demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles

- 5.1 Demonstrate compassion, integrity, and respect for others
- 5.2 Demonstrate responsiveness to patient needs that supersedes self-interest
- 5.3 Demonstrate respect for patient privacy and autonomy
- 5.4 Demonstrate accountability to patients, society, and the profession
- 5.5 Demonstrate sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual orientation
- 5.6 Demonstrate a commitment to ethical principles pertaining to provision or withholding of care, confidentiality, informed consent, and business practices, including compliance with relevant laws, policies, and regulations

SELECT 5.7 Demonstrate advanced ability in all of the above [Core Professionalism objectives], and the ability to inspire and instruct peers in these areas

6. Systems-Based Practice

Demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system to provide optimal health care

- 6.1 Work effectively in various health care delivery settings and systems relevant to one's clinical specialty
- 6.2 Coordinate patient care within the health care system relevant to one's clinical specialty
- 6.3 Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care
- 6.4 Advocate for quality patient care and optimal patient care systems
- 6.5 Participate in identifying system errors and implementing potential systems solutions
- 6.6 Perform administrative and practice management responsibilities commensurate with one's role, abilities, and qualifications

SELECT 6.7 Show advanced ability to incorporate knowledge of health systems and cost of care into medical decisions.

SELECT 6.8 Strategize, practice, and advocate for quality improvement in patient care and health care systems.

SECECT 6.9 Integrate knowledge of healthcare systems into individual patient care.

7. Interprofessional Collaboration

Demonstrate the ability to engage in an interprofessional team in a manner that optimizes safe, effective patient- and population-centered care

- 7.1 Work with other health professionals to establish and maintain a climate of mutual respect, dignity, diversity, ethical integrity, and trust
- 7.2 Use the knowledge of one's own role and the roles of other health professionals to appropriately assess and address the health care needs of the patients and populations served
- 7.3 Communicate with other health professionals in a responsive and responsible manner that supports the maintenance of health and the treatment of disease in individual patients and populations
- 7.4 Participate in different team roles to establish, develop, and continuously enhance interprofessional teams to provide patient- and population-centered care that is safe, timely, efficient, effective, and equitable

SELECT 7.5 Demonstrate advanced team competencies in assessment and coaching in order to achieve a common patient-centered end.

8. Personal and Professional Development

Demonstrate the qualities required to sustain lifelong personal and professional growth

- 8.1 Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in appropriate help-seeking behaviors
- 8.2 Demonstrate healthy coping mechanisms to respond to stress
- 8.3 Manage conflict between personal and professional responsibilities
- 8.4 Practice flexibility and maturity in adjusting to change with the capacity to alter one's behavior
- 8.5 Demonstrate trustworthiness that makes colleagues feel secure when one is responsible for the care of patients
- 8.6 Provide leadership skills that enhance team functioning, the learning environment, and/or the health care delivery system
- 8.7 Demonstrate self-confidence that puts patients, families, and members of the health care team at ease
- 8.8 Recognize that ambiguity is part of clinical health care and respond by utilizing appropriate resources in dealing with uncertainty

SELECT 8.9 Demonstrate emotional intelligence by showing awareness of strengths, weaknesses, and idiosyncrasies of self, team, and systems, and then show the ability to modulate one's behavior to positively affect each of these.

SELECT 8.10 Describe the basic competencies necessary for effectiveness as a potential future physician and leader.

SELECT 8.11 Implement the professional and personal development process.

SELECT 8.12 Actively participate in one's own personal and professional development through individual and group coaching.

MCOM Clinical – Specialty Track Phase Objectives

Track EPA 1.1 Student will demonstrate the ability to gather a history

Track EPA 1.2 Student will demonstrate the ability perform a physical exam

Track EPA 2 Student will demonstrate the ability prioritize a differential diagnosis following a clinical encounter

Track EPA 3: Student will demonstrate the ability to recommend and interpret common diagnostic tests

Track EPA 4: Student will demonstrate the ability to enter and discuss orders and prescriptions

Track EPA 5.1: Student will demonstrate the ability to document a clinical encounter in the patient record

Track EPA 5.2: Student will demonstrate the ability to see multiple patients in a clinical session while maintaining accuracy and thoroughness of their history taking, physical exam skills, ability to create a differential diagnosis, implementation of the clinical plan and documentation.

Track EPA 6: Student will demonstrate the ability provide an oral presentation of a clinical encounter

Track EPA 7: Student will demonstrate the ability to form clinical questions and retrieve evidence to advance patient care

Track EPA 8: Student will demonstrate the ability to give or receive a patient handover to transition care responsibly

Track EPA 9: Student will demonstrate the ability to collaborate as a member of an interprofessional team

Track EPA 10: Student will demonstrate the ability to recognize a patient requiring urgent or emergent care and initiate evaluation and management

Track EPA 11: Student will demonstrate the ability to obtain consent for tests or procedures

Track EPA 12: Student will demonstrate the ability to perform procedures appropriate for their track specialty
